

Paranormal

Ashley Doughty & Haley Adams

Haley's Untold Stories

- ❖ Previously, my great grandmother and my aunt had passed away in my house. I live in the attic, and that is the room that they passed in. Many times, i've seen shadows apparitions (which are ghostly figures that are easily seen). I always felt like I was being watched, so when I would go look at the stairs, this black shadow would vanish.

Ashley's Untold Stories

- ❖ While my mom was in the hospital, one night my dad said he was woken out of his sleep and was greeted by his mother. She told everything was fine before she vanished into the air.
- ❖ During the day, my grandma said she heard a noise coming from the back door. She looked up and said she saw a tall man standing in a war outfit, she said it was as clear as day and then vanished.

- ❖ My horse shoe was in my box, kind of on the top but would need to move things to get to it, in the basement in the storage room. One day, my dad went down to get something and the horse shoe was placed on the floor with the horse hair sticking perfectly straight together. The box was not moved, and no one was downstairs to move in / we did not hear a loud noise from upstairs when it fell.
- ❖ My brothers boxes were against the wall when he was packing some things away he did not need. In the middle of the night, these boxes fell over. No force or vibration was made from the floor above and no one was downstairs to make the boxes fall.

Gettysburg Ghost Gals at Ashleys : Stories

- ❖ In 2015, my family had contacted the G.G.G. to come do an investigation to see why all these strange things were happening. While investigating, they detected multiple spirits in the house. The first was my Poppy, which is my dad's dad, seen hanging around my dad's haunting wall. A smell of a cherry cigar was visible, which happened to be my great grandpa hanging with my poppy.

- ❖ In the storage room, the saw an old lady standing around with some kids. When the medium has spoke, she found out this lady was the lady who owned the orphanage during the civil war, with the children spirits that came with her. This lady would of have the boys beat the girls when they misbehaved.
- ❖ In my bedroom, there is a little old lady who protects over my room. She came over as a good energy and told the medium she means no harm but to protect. To this day, this spirit lady is still in my room.

- ❖ Why is it important to be careful when communicating with spirits?

You never know who you will be talking to. It could be a bad or evil spirit pretending to be someone who they are really not. If you do it in your home, be careful because you can open a portal to negative energy because you have the power to. It is okay if someone else does it because they do not have the power to.

❖ In your opinion, why don't most people believe in spirits?

Adults have more of a closed mind, and if something happens to them they try to prove it scientifically. Children have more of an opened mind, so if something happens to them they go with it. It is easier for spirits to connect with children better than adults.

❖ Will spirits try to communicate with certain people?

Yes, if so, it is because they want to contact family members. Some spirits try to contact through dreams, they want to be acknowledged.

❖ What happens to the spirit when a human dies?

When someone dies, their spirit goes back to the point in life where they are most happiest at. This can be an age or place.

❖ Why won't spirits leave?

Some stay restless and hold on to something they don't feel the need to leave.

❖ Do spirits know they are dead?

No, some spirits believe they are still in present day and get confused why humans can't see or hear them, or this can happen if they die in horrific way.

The Investigation : Ashley's House

- ❖ Setting up the investigation, we planned to do it at night in the basement. We placed a toy in the middle of the floor and asked the spirits around us countless questions. No noise was made that they were present, however I could hear faint footsteps. Since we did not get enough data, we moved the investigation to the kitchen where we got more contact than the basement.
