

UNTOLD STORIES

Of The Paranormal

Facts From Randy

Why do some spirits appear different?

Spirits go back to a time where they are most happiest in life. This could be place or age.

Why do spirits stay?

Some spirits don't want to leave so they stay restless, or they hold onto something because they don't feel the need to leave.

Why do some spirits not know they passed on?

Spirits get confused if they die in a horrific way and why human's can not see or here them.

Why should you be careful when communicating?

Spirits can act differently to humans. Some spirits can tell you they are a child, when they really could be negative energy trying to open a portal.

There are answers that we are seeking from the spirits around us.

When contacting spirits, Randy Hammons from North Eastern Paranormal Investigators stated, "You never know who you are talking to. It could be a bad spirit pretending to be someone who they are really not."

On Appleford Way, the Doughty residents had spoke to Randy about the paranormal activity that was happening. It is said to believe that children spirits are present in the basement, along with older spirits who have no connection to these children.

Noted, Randy had specified that when communicating with these children spirits to be careful, their identity as a child could be someone else. This means, the "child" who you are communicating to could be a negative spirit to open their portal for their world.

These "children" spirits come from an orphanage in

Gettysburg that were accompanied by the old lady who took care of them. With research and evidence from Bridget Goodley, an investigator of the Gettysburg Ghost Gals, this old lady would make the young boys beat the girls. To this day, even with the old lady spirit gone, these children are afraid of the residents.

More paranormal activity were documented in this house, things such as seeing apparitions, things falling unexpectedly in the middle of the night from the basement, past family member encounters, and cold energies of negative spirits. All of these can never be explained.

As Randy went on to explain these things, he transitioned into a topic that was boldly for some of these answers. "Spirits will try to contact through kids more than adults, children have more of an opened mind which is easier for a spirit to connect."

The residents can not confirm or deny if this is true for their family, as both the kids and adults who came to the house, dealt with these spirits before. Although, the residents child has been more involved with spirit encounters. As for the residents on Webster Drive, the Adams family has seen apparitions in their own home.

Apparitions come and go. The residents have recalled seeing a black shadow figure at the end of the stairs, as if someone was watching them. When going to look for themselves, this figure would disappear quickly.

Before this family had settled in, previous family owners have lived in the house. Some have passed, which may be the apparition spirits that the residents are seeing in their house. However, these are only being seen more by the kids than the adults.

As Randy heard and took in this information, he explained, "Spirits want to contact family members. Some try to through dreams, some don't. They just want to be acknowledged."

This had reassured the residents that it may be passed on family. However, it is still unconfirmed if these apparitions are family. What can be confirmed is passed family members seen in the Doughty house. Only one contact at night was made from the grandmother seen to visit her son, Wayne Doughty Sr, the night his wife went to the hospital.

"Everything's alright," she had told her son before she manifested into the air.

Many stories will remain as the untold. Spirit connections can be dangerous, while some can safe. As Randy said, you should always be careful when communicating, you never know who you'll make contact to.
